

Solution Code

```
/* C Program to calculate simple interest */
```

```
#include<stdio.h>
```

```
#include<conio.h>
```

```
int main()
```

```
{
```

```
    float principal,rate,time;
```

```
    float simpleInterest;
```

```
    printf("Enter the principal amount :: ");
```

```
    scanf("%f",&principal);
```
