

Solution Code

```
/* C Program to Accept ten numbers and display sum of even and product of odd numbers */
```

```
#include<stdio.h>
#include<conio.h>
int main()
{
    int n,sum=0,mul=1,i;
    printf("Enter 10 numbers :: \n");
    for(i=0;i<10;i++)
    {
        printf("\nEnter %d number :: ",i+1);
        scanf("%d",&n);
        if(n%2==0)
            sum=sum+n;
        else
            mul=mul*n;
    }
    printf("\nThe sum of even numbers is : %d \n",sum);
    printf("\nThe multiplication of odd numbers is : %d\n",mul);
    return 0;
}
```
