

# Solution Code

```
/* C Program to find Frequency of characters in a String */
```

```
#include<stdio.h>
#include<conio.h>
void main() {
    int i,count=0;
    char ch[20],c;
    clrscr();
    printf("Enter Any String: ");
    gets(ch);
    printf("Enter any Character form string: ");
    scanf("%c",&c);
    for(i=0;ch[i]!='\0';i++) {
        if(ch[i]==c)
            count++;
    }
    if(count==0) {
        printf("Given character not found");
    }
    else {
        printf("Repetition of %c is %d times",c,count);
    }
    getch();
}
```
