

Solution Code

```
import java.util.Scanner;

class SumofDigit
{
public static void main(String[] args)
{
    int a,no,sum=0;
    Scanner s=new Scanner(System.in);
    System.out.println("Enter any number: ");
    no=s.nextInt();
while(no>0)
{
    a=no%10;
    no=no/10;
    sum=sum+a;
}
    System.out.println("Sum of Digits :"+sum);
}
}
```
