Solution Code

```java
import java.util.Scanner;

public class JavaProgram {

    public static void main(String[] args) {

        int n,i=2;
        Scanner sc = new Scanner(System.in);
        System.out.println("Please Enter any No. : ");
        n=sc.nextInt();

        while(true)
        {
            if(n==1)
            {
            System.out.println("Smallest Prime number is 2");
            break;
            }
            if(n%i==0)
            {
                break;
            }
            else
            {
                i++;
            }
        }
```

Solution Code

```java
        }
    }
    if(n==i)
    {
        System.out.println("Prime No.");
    }
    else
    {
        System.out.println("Not Prime No.");
    }
}

}
```
