

# Solution Code

```
import java.util.Scanner;

public class find_length
{
    public static void main(String args[])
    {
        String str;
        int len;
        Scanner scan = new Scanner(System.in);

        System.out.print("Enter Your Name : ");
        str = scan.nextLine();
        len = str.length();

        System.out.print("Length of Entered String is " + len);
    }
}
```
