

# Solution Code

```
import java.util.Scanner;

class Compare_Strings
{
    public static void main(String args[])
    {
        String s1, s2;
        Scanner in = new Scanner(System.in);

        System.out.println("Enter the first string");
        s1 = in.nextLine();

        System.out.println("Enter the second string");
        s2 = in.nextLine();

        if ( s1.compareTo(s2) > 0 )
            System.out.println("First string is greater than second.");
        else if ( s1.compareTo(s2) < 0 )
            System.out.println("First string is smaller than second.");
        else
            System.out.println("Both strings are equal.");
    }
}
```
