

Solution Code

```
import java.util.Scanner;

public class Substrings_String
{
    public static void main(String args[])
    {
        String string, sub;
        int i, c, length;

        Scanner in = new Scanner(System.in);
        System.out.println("Enter a string ");
        string = in.nextLine();

        length = string.length();

        System.out.println("Substrings of \""+string+"\" are :-");

        for( c = 0 ; c < length ; c++ )
        {
            for( i = 1 ; i <= length - c ; i++ )
            {
                sub = string.substring(c, c+i);
                System.out.println(sub);
            }
        }
    }
}
```
