

Solution Code

```
import java.util.Scanner;

public class Delete_Vowels
{
    public static void main(String args[])
    {
        String str1, str2;
        Scanner scan = new Scanner(System.in);

        System.out.print("Enter any String to delete vowels : ");
        str1 = scan.nextLine();

        System.out.println("\nBefore Removing Vowels, String is : \" " + str1 + "\" ");
        str2 = str1.replaceAll("[aeiouAEIOU]", "");

        System.out.println("\nAfter Removing Vowels, String is : \" " + str2 + "\" ");

    }
}
```
