

Solution Code

```
def not_poor(str1):  
    snot = str1.find('not')  
    spoor = str1.find('poor')  
  
    if spoor > snot and snot>0 and spoor>0:  
        str1 = str1.replace(str1[snot:(spoor+4)], 'good')  
        return str1  
    else:  
        return str1  
print(not_poor('The lyrics is not that poor!'))
```
