

## Solution Code

```
def remove_char(str, n):  
    first_part = str[:n]  
    last_part = str[n+1:]  
    return first_part + last_part  
print(remove_char('Python', 0))  
print(remove_char('Python', 3))  
print(remove_char('Python', 5))
```
