

Solution Code

```
def get_max_occurring_char(str1):  
    ASCII_SIZE = 256  
    ctr = [0] * ASCII_SIZE  
    max = -1  
    ch = ""  
    for i in str1:  
        ctr[ord(i)]+=1;  
  
    for i in str1:  
        if max < ctr[ord(i)]:  
            max = ctr[ord(i)]  
            ch = i  
    return ch  
  
print(get_max_occurring_char("Python: Get file creation and modification  
date/times"))  
print(get_max_occurring_char("abcdefghijklb"))
```
